

CYBER SECURITY STRATEGY & VISION

Develop and implement continuity with safety

CBS offers a comprehensive Service Catalogue related to Cyber Security for critical infrastructures. We cover all areas like GRC Consulting, VA/Pentesting, Post-Incident recovery and SOC services

GRC COMPLIANCE ROADMAP

Governance Risk and Compliance services (vCISO) involve assisting customers to be compliant with:

- ISO27001 / ISO27701
- ISO22301
- NIS2 compliance

TESTING TECH COMPLIANCE

Testing customer infrastructures for cyber security readiness checks, like:

- Vulnerability assessments
- Penetration Tests
- Web Application Pentesting
- API Security assessment

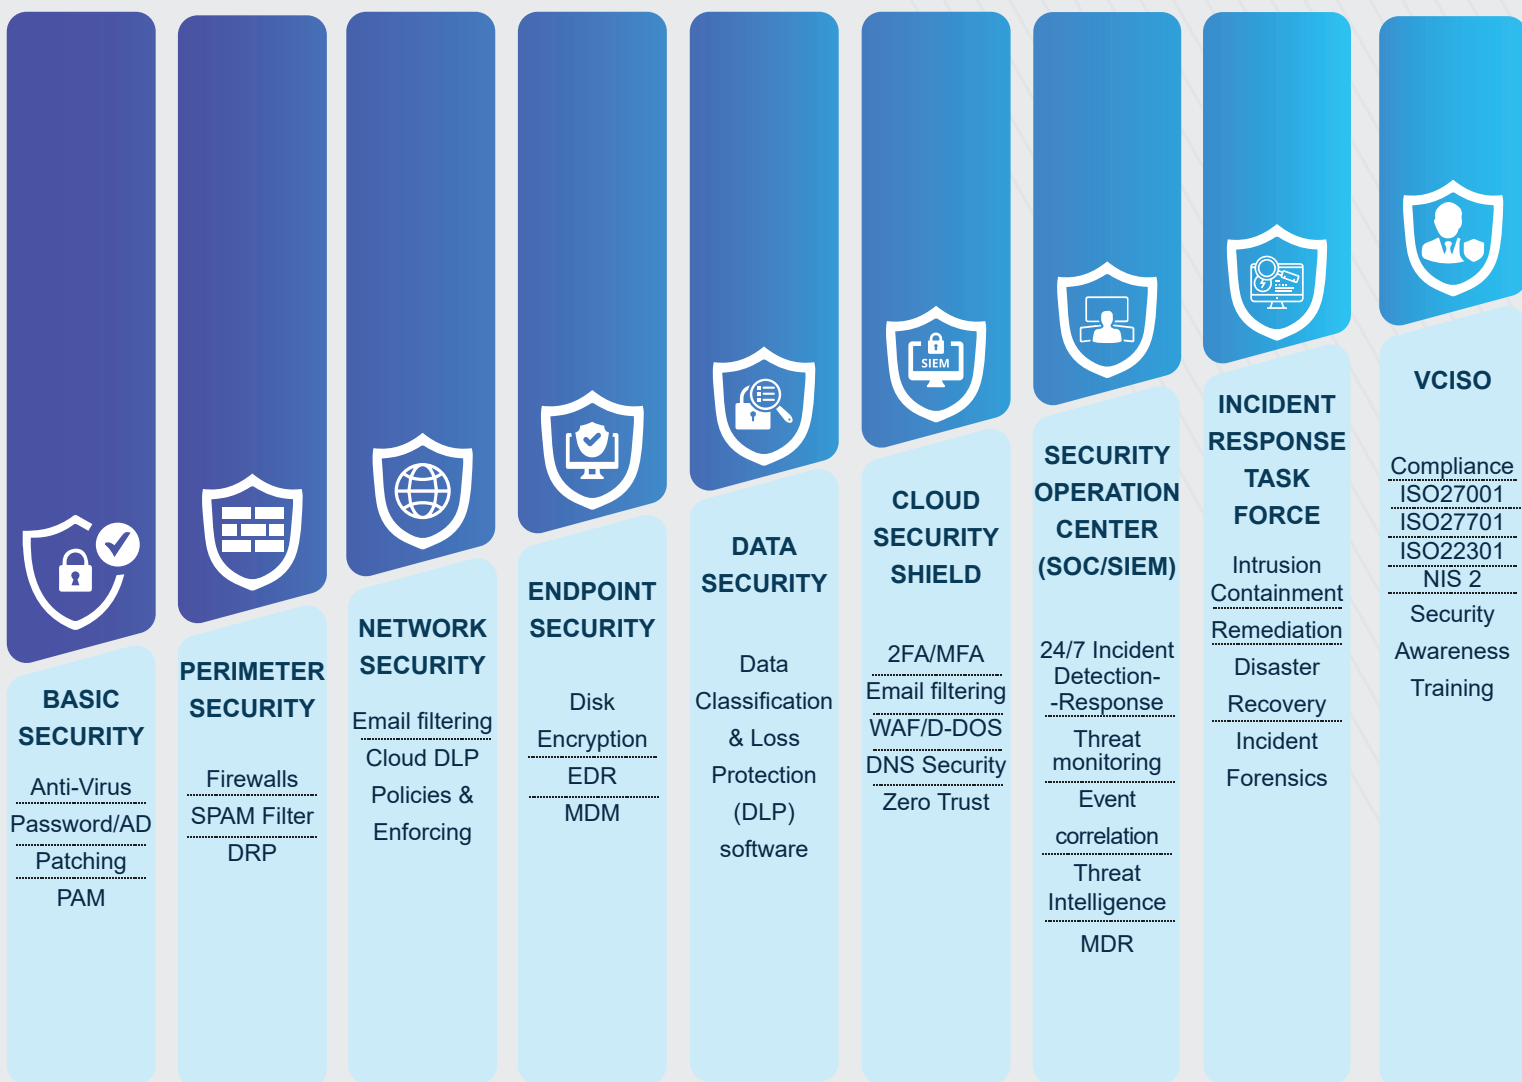

PRODUCT & SERVICE SOLUTIONS FOR CYBER SECURITY

Performance monitoring combined with Security monitoring and response offers complete protection to the customer, combining solutions like:

- SOCaaS Service
- Managed EDR
- NOCaaS Service
- Post Incident Forensics and Incident Recovery tasks

Complete Cyber Security Defense from lower value basic Controls to Maximum Safety services

Purchasing the most efficient software and hardware solutions is never enough. Any infrastructure should be assessed by a 3rd party Consultant so that a maturity assessment & GAP analysis can deliver the next steps needed. Thus continuous assessment and improvement proposals can be offered by Cosmos Business Systems, as shown in the protection pillars below:
